Education

B.Sc.	Ankara University , B.Sc. in Software Engineering – Gölbaşı, Ankara, Türkiye • GPA: 3.64/4.00, Third Place • Founder / Board Member (2025), Vice President (2026) of Digital Technologies and Software (DIGIWARE) Community	Sept 2022 – June 2026
H.S.	Kadıköy Anadolu High School , H.S. in Science – Kadıköy, İstanbul, Türkiye • GPA: 91.73/100	Sept 2016 – June 2021

Experience

Turkish Aerospace Industries , Candidate Engineer – Kahramankazan, Ankara, Türkiye • Developed an industrial part assignment and production scheduling system to optimize intradepartmental manufacturing workflows and task allocation. • Built an XGBoost-based task assignment model that dynamically pairs manufacturing jobs with technicians by analyzing employee skill matrices and current workloads. • Designed a desktop management GUI using Tkinter featuring real-time production tracking, interactive Gantt charts, and calendar integration to monitor workflow efficiency.	Nov 2025 – May 2026
BİTES Defence and Aerospace Technologies , Summer Intern – Ankara, Türkiye • Managed the entire software development lifecycle (SDLC) of a web-based application within a two-person agile team, from requirement analysis to production deployment. • Architected the frontend layout by designing user-friendly, dynamic, and responsive UI components, while engineering end-to-end backend workflows, database management, and API integrations. • Maintained high code quality and system architecture optimization utilizing Git version control, taking full ownership of all full-stack development processes.	Aug 2025 – Sept 2025

Projects

Micromobility Suitability Decision Support System: MicroSUIT [GitHub] Analyzing the suitability of streets in Gölbaşı for micro-mobility transformation by evaluating traffic, infrastructure, and accessibility datasets. • Conducted an AI-based evaluation to analyze the suitability of central Gölbaşı streets for micro-mobility (e-scooters, bicycles) transformation. • Executed real-time semantic segmentation on street-level imagery collected via Google Street View and Mapbox using the SegFormer architecture, leveraging a Large Language Model (LLM) to interpret road-to-sidewalk ratios. • Performed traffic congestion analysis using the Google Maps API to generate suitability scores via the Analytical Hierarchy Process (AHP), merging the outputs with OSMnx networks for geospatial visualization in GeoPandas.	Nov 2025 – present
ChatWork Real Time Messaging Platform [GitHub] Co-developed a web application within a four-person team to grasp network programming fundamentals and architect a scalable, real-time chat ecosystem. • Architected the real-time instant messaging infrastructure and executed end-to-end integration between the frontend and backend layers. • Designed an optimized relational database schema to securely store chat history, user profiles, and messaging logs with high data integrity. • Contributed to the development and system integration of a WebRTC infrastructure, enabling users to conduct seamless real-time voice and video calls.	Oct 2024 – Jan 2025

Publications

Comparative Analysis of MLP and Vision Transformers for Video Memorability Classification

Sept 2025

Conducted a comparative performance analysis of video memorability classification on the Memento10k dataset, utilizing traditional features (HOG, LBP) and deep learning-based representations (VGG, ResNet) evaluated across MLP and Vision Transformer (ViT) architectures, while investigating the impact of global attention mechanisms through temporal analysis of video frames.

Elif Nur TEKAY, İrem Azra İŞLEYEN, Barış GÜNGÖR, Assoc. Prof. Murat KARAKUŞ, Asst. Prof. Rukiye SAVRAN KIZILTEPE
10.1109/UBMK62635.2024.11207010 (2025 10th International Conference on Computer Science and Engineering (UBMK))

Skills

AI and Computer Vision: Python, YOLO (v8/v11), Vision Transformers (ViT), SegFormer, Machine Learning, XGBoost

Full-Stack Development: Node.js, Express.js, Spring Boot, Vue.js, React.js, WebSocket, JavaScript, HTML/CSS, PyQt5, Tkinter

Databases, Tools and Languages: SQL, MySQL, C/C++, Git, MS Office, Java

Soft Skills: Self-Discipline, Time Management, Attention to Detail, Collaborative Mindset, Empathy, Competitive Chess Player (10 Medals)

Languages: Turkish (Native), English (Upper Intermediate — B2/C1)
